

RI TRANSPARENCY REPORT 2020

3i Group plc

An investor initiative in partnership with UNEP Finance Initiative and UN Global Compact

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <u>PRI website</u>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

		usiness involves a specific ESG risk, the company is requi r a reasonable time period. If the company does not mee	

to 3i's investment, 3i requires them to commit to implementing appropriate measures to mitigate the risk within a suitable timeframe. Such measures may include meeting relevant international standards, such as the IFC performance standards, where these are more stringent than local law. 3i will support the company to do this by developing action plans with appropriate targets, timetables and resources. The minimum standards expected of 3i portfolio companies are as follows: 1. comply with all Applicable Laws relating to environmental, social, health and safety, extortion, bribery and corruption matters; 2. demonstrate that they have the commitment, capacity and track record to effectively identify, monitor and manage the potential ESG risks facing their business (e.g. by having or committing to put in place: specific policies; regular reporting to the board; adequate management systems; clear assignment of responsibility; adequate training for staff and low injury and accident rates); 3. where real, material environmental or social risks are identified through due diligence, be committed to implementing (within an agreed timeframe) appropriate measures to mitigate those risks which may include meeting relevant International Standards (where these are more stringent than Applicable Laws); and 4. where real, material bribery risks are identified through due diligence, be committed to implementing (within an agreed timeframe) improvements or additions to their anti-bribery principles and bribery prevention procedures which are appropriate to their business and the bribery risks they face. We do not expect that all of our portfolio companies will necessarily meet all of the minimum standards immediately following 3i's investment. However, we do expect the executive management team to be fully committed to meeting the minimum standards within a reasonable timeframe and 3i will support them to do so. When appropriate or necessary, 3i's investment teams may incorporate ESG improvement requirements into the investment agreement. e.g. a requirement for the board to undertake an independent assessment of the company's potential exposure to corruption and bribery or cyber security risk. Typical improvement areas can relate to the investee companies' ESG risk management programmes. Recent examples have included: anticorruption programmes; compliance with international sanctions; business resilience strategy; cyber and technology resilience strategy. 30 days after investment a formal review is undertaken. This includes current trading and outlook, review of the Board and management and the scope, content and timetable for the 180 day post-investment action plan. A formal review of the progress of the 180 day plan is then carried out after 90 days and 180 days. O No Mandatory PRI 1,3
